A BIBLIOGRAPHY ON COLD WEATHER CONSTRUCTION

Compiled by D. C. Tibbetts 1956

Revised by G. G. Boileau, Nov. 1965

BOREAL INSTITUTE
LIBRARY

Revised by Y. Fortier, July 1969

SUBJECT INDEX

- A. Buildings
- B. Hydro and Marine
- C. Highways, Railroads and Runways
- D. Foundations
- E. Scheduling and Costs
- F. Concrete and Concreting Methods
- G. Brick and Concrete Masonry
- H. Enclosures and Heating for Protection and Curing
- I. Equipment
- J. Miscellaneous

DIVISION OF BUILDING RESEARCH • NATIONAL RESEARCH COUNCIL • OTTAWA, CANADA

Copies of articles listed in this Bibliography may be obtained, in general, through the photocopying service of the National Research Council of Canada. The cost of copies prepared by the Xerox method is \$0.10 per sheet with a minimum charge of \$0.50. (This process does not reproduce photographs and halftones clearly.) Microfilms (35mm) are also available on request; the rate for this service is \$0.15 for 10 exposures or fraction thereof with a minimum charge of \$1.00. A discount will be allowed to the libraries of Canadian Universities. Requests for copies of articles should be addressed to the Interlibrary Loan and Photocopying Service, National Science Library, National Research Council of Canada, Sussex Drive, Ottawa 2, Canada. Remittances can be made by cash (stamps are not acceptable), money order, or cheque (made payable at par in Ottawa, credit National Research Council).

A BIBLIOGRAPHY ON COLD WEATHER CONSTRUCTION

Compiled by D. C. Tibbets.

Revised by Y. Fortier

A. BUILDINGS

Army cantonment built in sub-zero weather, D. B. Niederlander. Civil Engineering (N.Y.) v. 12, n.4, p. 187-90, April 1942.

Builders in cold climates do something about the weather. American Builder, v.73, p. 162-5, October 1951.

Building base camps for Dew Line; saga of arctic construction, J. Cook, Roads and Engineering Construction, v.94, p.53, April 1956.

Building below zero; Thule air base, Architectural Forum, v.108, p.116-21, February 1958.

Building in Russia during the winter. Building Digest, 13(8), p.248, August 1953.

Construction methods in Sub-Arctic, A. Merritt. Pacific Builder and Engineer, v.50, n.2, p.33-4, February 1944.

Constructional work in winter warfare, S. H. Clark. Royal Engineer's Journal, 65(2), p.212-14, 1951.

Here are some useful tips on winter building. American Builder, v.74, n.11, p.123, November 1952.

How one builder beat winter weather. Engineering News-Record, v.147, n.3, p.33-4, July 19, 1951.

How to build in winter; an on-the-job study. American Builder, v.75, n.10, p.108-18, October 1953.

How to do a better job of winter construction. Masonry Building, v.16, n.5, p.12, November 1953.

How to keep those winter jobs rolling. Masonry Building, v.18, n.5, p.22-7, November 1954.

Keep that job moving in hot-wet-cold weather. American Builder, v.76, n.10, p.114, October 1954.

Montreal; a winter construction showcase. Engineering News-Record, v.166, p.42-46, February 23, 1961.

Soviet Union develops new building techniques. Engineering News-Record, v.136, n.20, p.798-801, May 16, 1946.

BOREAL INSTITUTE
LIBRARY

~~HYDRO AND MARINE~~

Unique methods for winter construction of large factory near Toronto. Engineering and Contract Record, v.50, n.51, p.110-13-17, December 16, 1936.

Using slip forms in winter construction. American Contractor, v.50, n.24, p.15-16, June 15, 1929.

Winter Construction. Contractors and Engineers Monthly, v.25, n.6, p.19, December 1932.

Winter construction in Ontario, H. Rhys Davies. Civil Engineering and Public Works Review, v.49, n.581, p.1195, November 1954.

Winter's plan pays off this spring; construction of convent in Connecticut. Engineering News-Record, v.166, p.84, April 13, 1961.

Added July 1969 revision:

Structures for Small Arctic Surface Camp: F. L. Russell. Civil Engineering (NY) Vol. 38, No. 1, January 1968, p. 65-7.

Surface Characteristics Effect on Thermal Regime. Phase I: A. E. Wechsler, P. E. Glaser, U.S. Engineering Dept. - Cold Regions Research and Eng. Laboratory - Special Report 88. April 1966, 26p.

Overcoats for concrete on Illinois lock. Construction Methods and Equipment, v.31, p.90, March 1949.

Pier 57 completed through the winter. M. S. Morris. American Concrete Institute Journal, v.25, p.281-4, December 1953.

Placing concrete during cold weather. Emil Silverman. The Military Engineer, v.XLVI, n.314, p.414, November-December, 1954.

Quick mixes for winter pours at Buggs Island Dam. Construction Methods and Equipment, v.32, p.76-7, February 1950.

St. Lawrence construction defied the winter. Engineering News-Record, v.156, p.38-40, 5 April 1956.

St. Lawrence is year-round job. Construction Methods, v.38, p.52-3, April 1956.

Seaway gets through its biggest crisis. Business Week, p.64-84, 1 December 1956.

Schedule of winter power job forces fast pace all winter.
Engineering News-Record, v.161, p.30-32, 10 March 1960.

B. HYDRO AND MARINE

Aeration permits water work at -30°F . Engineering News-Record, v.160, p.52, April 3, 1958.

Concreting in zero weather, H. H. Nicholson. Western Construction News, v.16, n.7, p.206-8, July 1941.

Constructing \$20,000,000. Alaska Barge Terminal at Excursion Inlet, H. H. Edwards. Pacific Builder and Engineer, v.50, n.8, p.40-44-48-52-54, August 1944.

Hot mix for cold weather; Iroquois Dam. Construction Methods, v.38, p.124-5, April 1956.

Ice dam to be built in northwest; Seattle City light will freeze Skagit River bed. Electrical World News, v.144, p.32, September 26, 1955.

Kelsey Generating Station dam and dykes, D. H. MacDonald, R. A. Pillman, H. R. Hopper. Engineering Journal, v.43, n.10, p.87-98, October 1960.

Mountain dam spillway housed for winter work, C. A. Gould. Engineering News-Record, v.117, n.22, p.756-7, November 26, 1936.

Novel anti-icing scheme kept bridge job going; aeration pipes prevent ice from forming. Roads and Streets, v.101, p.106, April 1958.

Overcoats for concrete on Illinois lock. Construction Methods and Equipment, v.31, p.90, March 1949.

Pier 57 concreted through the winter, M. D. Morris. American Concrete Institute Journal, v.25, p.281-4, December 1953.

Placing concrete during cold weather. Emil Silverman. The Military Engineer, v.XLVI, n.314, p.414, November-December, 1954.

Quick steam for winter pours at Buggs Island Dam. Construction Methods and Equipment, v.32, p.76-7, February 1950.

St. Lawrence construction defied the winter. Engineering News-Record, v.156, p.38-40, 5 April 1956.

St. Lawrence is year-round job. Construction Methods, v.38, p.82-3, April 1956.

Seaway gets through its biggest crisis. Business Week, p.64-84, 1 December 1956.

Schedule of Niagara power job forces fast pace all winter.
Engineering News-Record, v.164, p.30-32, 10 March 1960.

Added January 1966
Twenty below, but concreting continues on Union Falls Dam
project for Central Maine Power Company. Construction
Methods and Equipment, v.30, p.80-5, March 1948.

Use of salt in clay core aids winter dam building, J. B. Hays.
Engineering News-Record, v.151, p.11, 6 August 1953.

Winter concrete construction on Rapide Croche Lock. Engineering
News-Record, v.112, n.16, p.493-5, 19 April 1934.

Winter concrete work goes forward under enclosure at Gavins
Point Dam. Engineering News-Record, v.153, p.18,
30 December 1954.

Wintertime concreting at Soo. Engineering News-Record, v.135,
n.4, p.94-9, 26 July 1945.

Winter concreting can be economical; large-dam construction
in Canada, G. Mitchell and R. B. Young. Civil Engineering,
v.20, p.511-15, August 1950.

Winter concreting intrusion method combined on barge canal lock
repair. Engineering News-Record, v.146, n.12, p.32-3,
22 March 1951.

Winter construction of low head automatic hydro electric plant,
D. Hutchinson and R. F. Legget. Contractors and Engineers
Monthly, v.22, n.4, p.77-81, 104, April 1931.

Winter dam construction in Canada, J. M. Connolly. Construction
Methods and Equipment, v.32, p.42-6, May 1950.

Wintertime guniting at the Soo; Davis lock at Sault Ste. Marie.
Engineering News-Record, v.140, p.96, 10 June 1948.

Added November 1965 revision:

No hibernation for concreters at Manic Two. W.W. Jacobus. Engineering
News-Record, Vol. 171, November 14, 1963, p. 74 - 6.

Russians build plant in sub-zero weather; Bratsk dam and hydroplant.
Electrical World, Vol. 161, January 13, 1964, p. 98.

Added July 1969 revision:

Cold Weather Operation. L. A. Jackson. Water Works and Wastes Engineering. Vol. 2, February 1965, p. 54-5.

Milwaukee Gas Light Wets a Winter Line. Gas Age, Vol. 132, September 1965, p. 28-31.

Top Is Bottom on Alaska Lake. Engineering News - Record, Vol. 175, July 1965, p. 95.

Water Supply and Waste Disposal in Alaska Native Communities. K. C. Lauster. Civil Engineering (NY), Vol. 37, No. 4, April 1967, p. 66-8.

C. HIGHWAYS, RAILROADS AND RUNWAYS

Airfields on permafrost, K. A. Linell. American Society of Civil Engineers, Proc. v.83 (AT 1 No. 1326) p.1-15. Discussion (AT 1 No. 1328) p.27-33, July 1957.

Alcan Highway, H. J. McKeever. Roads and Streets, v.86, n.1, p.34-60, 70, 72, January 1943; v.86, n.2, p.40-52, February 1943.

Army Engineers build compacted snow runway in 72 hours. Construction Methods, v.37, p.86, May 1955.

"Black top" for paving Iowa Airfield mixed, laid during coldest weather. Pit and Quarry, v.36, n.4, p.69-70, October 1943.

Building standardized bridges for county. J. F. Mollenkopf. Public Works, v.73, n.7, p.25-7, July 1942.

Build-up for Better Trans-Arctic Bases, W. Bowman. Engineering News-Record, v.158, n.6, p.30-1, February 1957.

Canvas cover permits wet weather paving on concrete deck of Pit River Bridge. Engineering News-Record (News Issue) v.128, n.6, p.11, 5 February 1942.

Cold-weather low-cost road construction using tar, A. R. Taylor. Public Works, v.66, n.1, p.23-4, January 1935.

Concrete in track elevation work placed in cold weather, L. W. Skov. Concrete, v.39, n.4, p.7-9, October 1931.

Concrete paving successful in sub-zero weather, H. P. Chapman. Engineering News-Record, v.112, n.16, p.501-2, 19 April 1934.

Concreting in cold weather. Concrete and Constructional Engineering, v.38, n.11, p.35-9, November 1943.

Concreting in cold weather. Concrete and Constructional Engineering, v.39, n.6, p.158-63, June 1944.

Contractor Works all Winter on Big Idaho Grading Project, F. K. Ross. Pacific Builder and Engineer, v.64, n.4, p.80-1, April 1958.

Crushing and Laying Rock through Oregon Winter. Pacific Builder and Engineer, v.62, n.12, p.66-7, December 1956.

Day's routine of placing concrete during cold weather. Concrete, v.49, n.1, p.16, 25, January 1941.

Deck paving at ten below zero; Bad River Bridge. Construction Methods, v.38, p.68-9, April 1956.

Detroit contributes to winter paving experience. Roads and Streets, v.78, n.1, p.1-3, January 1935.

Die Anwendung von Bitumen-Specialemulsionen bei Mischdecken, K. Wagner, Bitumen, v.17, n.6, p.132-5, August 1955.

Eight winter earthmoving tips. Roads and Streets, v.104, p.72, November 1961.

Heated canvas shelters protect winter concrete paving job, M. D. Hichman, Roads and Streets, v.77, n.4, p.143-4, April 1934.

Hot cement has no ill effects in concrete paving. Engineering News-Record, v.108, n.7, p.214, 18 February 1932.

How the contractors kept busy last winter on Illinois tollway. Roads and Streets, v.101, p.90-2, August 1958.

Insulated forms for winter construction of bridges. K. R. Scurr. National Research Council - Highway Research Board - Bul. n.162, 19n. 1957.

Keeping building forces busy during winter. Railway Engineering and Maintenance, v.27, n.11, p.968-71, November 1931.

Lay street railway paving concrete in zero weather. Concrete, v.42, n.6, p.6-7, June 1934.

Ohio's winter concrete paving work points way to other states. Concrete, v.42, n.1, p.7-8, January 1934.

Repaving heavy traffic street in cold weather using high early strength cement. Public Works, v.65, n.3, p.11-2, March 1934

Soil problems differ on northern roads. Engineering and Contract Record, v.71, n.9, p.112-3, 116-7, September 1958.

Some problems of road construction and maintenance in Alaska, S. Taber. Public Roads, v.23, n.9, p.247-51, July-August-September 1943.

Special construction at Quonset, Rhode Island. Engineering News-Record, v.126, n.23, p.68-73, 5 June 1941; p.79, 17 July 1941.

Thin bridge floors concreted in Vermont winter. Engineering News-Record, v.104, n.25, p.1002, 19 June 1930.

Two winter paving jobs in Indianapolis, Indiana. Engineering News-Record, v.112, n.11, p.346-7, 15 March 1934.

Unemployment relief spurs winter construction of highway bridges. Construction Methods, v.14, n.9, p.14-19, September 1932.

Winter deck pour helps meet job schedule; Peoria, Ill.
J. R. Cummings. Roads and Streets, v.103, p.86-8,
October 1960.

Winter paving project in Illinois removes bad traffic jam.
Concrete, v.43, n.5, p.3-4, 28 May 1935.

Winter roads over muskeg, J. G. Thompson. Canadian Mining
and Metallurgical Bulletin, v.50, n.539, p.159-62, March
1957.

Winter-laid 10,000 lb. concrete on Chicago viaduct, A. R. Lord.
Engineering News-Record, v.105, n.7, p.258, 14 August 1930.

Winter-placed concrete paving work easily protected, D. S. MacBride.
Concrete, v.42, n.5, p.305, May 1934.

Wintertime was swamp filling time. Roads and Streets, v.102,
p.82-4, April 1959.

Zero outside, but bridge work goes on; use of polyethylene
film. Roads and Streets, v.102, p.86, June 1959.

Added November 1965 revision:

Enclosed scoop - loaded bins permit winter mix products. Roads and
Streets, Vol. 105, March 1962, p. 146 - 7.

Greenhouses protected winter bridge concreting. Roads and Streets,
Vol. 106, December 1963, p. 38 - 9.

India crash - builds roads in Himalayas. Engineering News-Record
Vol. 174, April 8, 1965, p. 101 - 2.

Lay hot mix in cold weather. Roads and Streets, Vol. 105, September
1962, p. 67 - 8.

Added July 1969 revision:

Critical Review of Literature Treating Methods of Identifying Aggregates
Subject to Destructive Volume Change When Frozen in Concrete and
Proposed Program of Research. T. Larson, P. Cody, M. Franzen,
J. Reed. Nat. Research Council, Highway Research Board. Special
Report 80. 1964, 81p.

Determination of Freezing Index Values. A. L. Straub, F. J. Wegmann.
Nat. Research Council, Highway Research Board, Research
Record No. 68 1965, p. 17-30.

D. FOUNDATIONS

Anchored foundation resists frost heave, D. B. McKinley. Civil Engineering (N.Y.), v.22, n.2, p.42-3, February 1952.

Arctic tower foundations frozen into permafrost, P. W. Roberts and F. A. F. Cooke. Engineering News-Record, v.144, n.6, p.38-9, 9 February 1950.

Constructional work in winter warfare, S. H. Clark. Royal Engineers Journal, 65(2), p.212-4, 1951.

Fast foundations in frozen ground. Engineering News-Record, v.128, n.21, p.853, 21 May 1942.

Foundations for mill construction on clay and permafrost. E. H. Bronson, Mining Engineering, v.9, Trans. p.1262-7, November 1957.

Frozen-in-place piles support Air Force Building in Alaska. Construction Methods and Equipment, v.38, n.6, p.62-4, June 1956.

Plenty of snow, but footings go in at Boston Airport. Construction Methods and Equipment, v.30, p.86-8, March 1948.

Rapid construction of foundations in frozen ground. Concrete and Constructional Engineering, v.37, n.11, p.403-4, November 1942 (also Engineering News-Record, 21 May 1942).

Winter construction. Contractors and Engineers Monthly, v.25, n.5, p.19-20, November 1932.

Added November 1965 revision:

Adverse weather - Its effects on engineering design and construction.

P. W. Roberts. Civil Engineering (NY), Vol. 33, No. 5, May 1963, p. 50 - 3.

Added July 1969 revision:

Frost Pressures in the Tie Back System at the National Arts Centre Excavation. G. C. McRostie, and W. R. Schriever. Engineering Journal, Vol. 50 March 1967, p. 17-21. (NRC 9493).

Measurement of Frost Heaving Forces on Piles. F. E. Crory, R. E. Reed.
U. S. Engineering Dept., Cold Regions Research and Eng. Laboratory,
Tech. Report 145, October 1965, 27p.

Winter Construction of Earthwork and foundations. D. P. Yoakum.
Civil Engineering, Vol. 37, August 1967, p. 50-2.

E. SCHEDULING AND COSTS

Balancing costs in winter concreting, D. S. MacBride. Engineering News-Record, v.119, n.20, p.795-7, 11 November 1937.

Building in cold weather benefits builder and buyer, W. T. Webb. Domestic Commerce, v.35, p.28-34, February 1947.

Construction time saved in winter by modern methods. Engineering and Contracting, v.67, n.2, p.101-4, February 1928.

Contractor maintains fast schedule on cold weather concrete job, E. Gruenwald. Construction Methods and Equipment, v.19, n.2, p.39-41, February 1937.

Costs of protecting winter construction, J. B. Lockwood. American Contractor, v.49, n.38, p.18-9, 22 September 1928.

Cutting down extra cost of concreting in cold weather. Concrete, v.49, n.11, p.22, 28, November 1941.

Economic factors in cold weather operations. E. B. Spice, Mining Engineering, v.8, p.712-7, July 1956.

Here's a record in winter construction. Contract Record, v.42, n.14, p.364-66, April 4, 1928.

Ideas for expediting cold weather jobs. Domestic Engineering, v.178, p.157, October 1951.

Infra-red rays protect winter brickwork at cost of \$1.25 for 16 hours. Brick and Clay Record, v.114, p.30, February 1949.

Low-cost winter concrete; Hudson Builders Material Company jets live steam into hoppers. M. D. Morris. Rock Products, v.54, p.230-1, August 1951.

Rapid construction at extremes of temperature, S. Gottlieb. Concrete and Constructional Engineering, v.35, n.4, p.186-90, April 1940.

Twelve-month construction. J. S. Taylor. Civil Engineering (N.Y.), v.1, n.4, p.322-5, January 1931.

Unit costs of winter concreting on two St. Louis buildings. Engineering News-Record, v.101, n.8, p.290, August 23, 1928.

A winter job - 83.4% on schedule. J. A. Burbank. Contractors and Engineers Monthly, v.16, n.2, p.81-3, February 1928.

Winter concreting can be economical, G. Mitchell and R.B. Young. Civil Engineering (N.Y.), v.20, n.8, p.27-31, August 1950.

Winter construction. Contractors and Engineers Monthly, v.25, n.4, p.21-2, October 1932.

Winter construction costs itemized on a concrete building, B. R. Gebhart. Engineering News-Record, v.102, n.9, p.356, 28 February 1929.

Winter construction provides work relief. Construction Methods, v.14, n.10, p.21-3, October 1932.

Winter works story in statistics. Engineering and Contract Record, v.72, n.10, p.92-95, October 1959.

Added November 1965 revision:

Keeping site work moving all the winter. Engineering, Vol. 196, October 4, 1963, p. 430 - 2.

Added July 1969 revision:

A matter of economics (Editorial). Roads and Engineering Construction, October 1960.

Proper planning can make winter pay off. Building Material News, December 1964.

Vinterbygge - En kostnadsstudie. Bertil Näslund. Stockholm. 1955. 218p.

F. CONCRETE AND CONCRETING METHODS

Accelerating densifier aids winter concreting: Sikacrete.
Engineering News-Record, v.154, p.44, 6 January 1956.

American Concrete Institute winter concreting symposium -
abstracts of papers. Roads and Engineering Construction,
v.94, p.125-31, November 1956. ACI Journal, v.28,
supp. p.17, December 1956.

Bétronnage par temps froid, cheminée de 140 m. de la centrale
de Grosbliederstroff, W. Thoma. Travaux, v.44, n.305,
p.105-112, March 1960.

Building code requirements for reinforced concrete (ACI 318-56)
American Concrete Institute Journal, v.27, n.9, p.913-86,
May 1956.

Cements and calcium chloride and cold weather. E.L.Howard.
American Concrete Institute Journal, v.27, p.378-80.
November 1955.

Chicago's cold in wintertime; how 5 ready mixed producers
continue year-round operations. Concrete, v.66,
p. 32-4, December 1958.

Cold weather concrete, D. Thompson. Concrete, v.46, n.12,
p.14, December 1938.

Cold weather concrete plant allows fast work. American
Contractor, v.49, n.39, p.18-9, September 29, 1928.

Cold weather concreting. Mass Transportation, v.35, n.12,
p.357-8. December 1939.

Cold weather concreting. Civil Engineering and Public Works
Review, v.45, n.525, p.183, March 1950.

Cold weather concreting methods. J. E. Foster. Contract Record,
v.42, n.48, p.1229-31, November 28, 1928.

Cold weather ready mixed concrete. Concrete, v.60, n.1,
p.19-20, 22, January 1952.

Cold weather ready mixed concrete. National Ready Mixed
Concrete Association. Publication 34, 13 p., September
1960.

Cold weather ready mixed concrete. Pit and Quarry, v.46, n.8,
p.158-60, 164, February 1954.

Concrete, W. E. Hart. Building Age, v.50, p.70-2, November 1928.

Concrete and winter. Concrete Construction, v.6, n.10, p.277-280, October 1961.

Concrete in cold weather construction. Paper Industry and Paper World, v.29, p.1649, February 1948.

Concreting goes on all winter; building at Brigham Young University. Construction Methods, v.39, p.178, March 1957.

Concreting in cold weather, W. E. Hart. Contract Record, v.45, n.45, p.1335-8, 11 November 1931.

Deck paving at ten below zero; Bad River Bridge. Construction Methods, v.38, p.68-9, April 1956.

De la gelivite de betons; La suppression en est-elle possible? J. Orth. Technique Moderne, v.11, n.6, p.163-72, 7 June 1956, p.203-12, July.

BRICK AND CONCRETE MASONRY

Are you prepared for winter operation? Brick and Clay Record, v.113, p.30-31, November 1948.

Bricklaying in freezing weather. H. Filippi. General Contractors Association Bulletin, v.23, n.1, p.16-18, January 1932 (also Engineering and Contracting, January 1931).

Cold weather construction with concrete masonry. Concrete Products, v.36, n.1, p.43-6, January 1929.

How to set brickwork in cold weather. Contract Record, v.46, n.44, p.1236-37, 2 November 1932.

No cold weather lay offs on this job as Masons lay brick within this Pliofilm tent covering two storey building. Construction Methods, v.37, p.63, March 1955.

Pointers for building in cold weather with structural clay products. American Builder, v.73, p.122-3, May 1951.

Protection of masonry in cold weather. C. H. Bach. Brick and Clay Record, v.109, p.30, October 1946.

War-time building construction. Engineering, v.150, n.3910, p.495, 20 December 1940.

You can lay brick in cold weather by winter-proofing your masons. Brick and Clay Record, v.111, p.39-40, November 1947.

Added July 1969 revision:

Cold Weather Masonry Construction. Technical Notes on Brick and Tile Construction. Vol. 7, No. 1, January 1956, 4p.

H. ENCLOSURES AND HEATING FOR PROTECTION AND CURING

A research for the curing of concrete by means of electricity, F. Ohama.
Japanese Society of Civil Engineers Journal, v.36, n.4,
p.186-90, 1951.

Automatic protection against freezing of bin aggregates. W.J. Shore.
Pit and Quarry, v.45, n.12, p.166, June 1953.

Big top speeds job during winter months in frigid Alaska. Construction
Methods and Equipment, v. 35, p.80-1, May 1953.

Boiler heats aggregate and speeds concrete deliveries. Southern Power
and Industry. v.68, n.3, p.78, March 1950.

Build those salamanders for your winter masonry jobs. C.W. Hubertz.
Brick and Clay Record, v.109, p.25, December 1946.

Build winter concreting enclosures of thin sheets of plywood. Z. Witkin.
Concrete, v.46, n.11, p.4, November 1938.

Builder's bubble shuts out winter trouble. Engineering News-Record.
v.162, p.55, 12 February 1959.

Building in box. Engineering News-Record, v.119, n.18, p.710-11,
28 October 1937.

Canvas cover permits wet weather paving on concrete deck of Pit River
Bridge. Engineering News-Record (News Issue), v.128, n.6,
p.11, 5 February 1942.

Circus tent, plastic sheeting helped bridge contractor defy winter.
J.R. Cummings. Roads and Streets, v.101, p.68-9, July 1958.

Cold weather protection of concrete. R.B. Young and W. Schnars.
American Chemical Institute Journal, v.5, n.4, p.292-304,
March-April 1934.

Concrete power dam goes under wraps for winter. Engineering News-
Record. v.160, n.4, p.42-4, 23 January 1958.

Develop electric heating for cold weather pours. Engineering News-Record,
v.150, p.56, 5 March 1953.

Electric Heating of concrete in winter construction. C. Itakura, American
Concrete Institute Journal, v.23, n.9, p.753-67, May 1952.

Electrical treatment of concrete in cold weather. P. Haller. Civil Engineering (London) v.45, n. 532, p. 651-3, October 1950.

Electrical power required for electrical curing of concrete in freezing weather, (in Japanese), Y. Ichiki and T. Matsui. Journal of Japan Society of Civil Engineers (Tokyo), v. 40, n. 6, p. 15-20, June 1955.

Electro-concrete, K. Billig. Institution of Civil Engineers Journal, v. 24, n. 8, p. 368-78, October 1945.

Experiments of electrical curing of concrete in freezing weather, Y. Ichiki. Japanese Society of Civil Engineers Transactions, v. 5, p. 33-41, 1950.

Giant enclosure shields winter concreting; Gavins Point dam. Construction Methods, v. 37, p. 67, April 1955.

Heated canvas shelters protect winter concrete paving job. M. D. Hickman. Roads and Streets. v. 77, n. 4, p. 143-4, April 1934.

Heater permits winter building and gives workmen comfort. Brick and Clay Record, v. 109, p. 30, November 1946.

Heating concrete aggregates in open stock piles. Concrete, v. 42, n. 10, p. 13-4, October 1934.

How new concrete work is protected during cold weather. Concrete, v. 49, n. 12, p. 20, 24, December 1941.

Infra-red lamps replace gas heaters for protecting steel-formed concrete. Engineering News-Record, v. 144, n. 16, p. 45, 20 April 1950.

Insulation for heat in winter concrete. Western Construction, v. 29, n. 11, p. 56-8, 74, November 1954.

Insulation for protection of new concrete in winter. L. H. Tuthill, R. E. Glover, C. H. Spencer and W. B. Bierce, American Concrete Institute Journal, v. 23, n. 3, p. 253-72, November 1951.

King-sized tents. Concrete Construction, v. 6, n. 12, p. 345-346, December 1961.

Live steam provides heat and ideal curing for concrete in cold weather. Concrete, v. 46, n. 10, p. 8, October 1938.

New ideas in winterizing, G. M. Wilson. World Oil, v. 150, n. 4, p. 80-82, 85-86, March 1960.

Outdoor work, indoor conditions; polyethylene film panels shield construction site. Plastics World, v.19, p.76, June 1961.

Portable shelters permit winter reservoir construction. Public Works, v.84, n.8, p.88, August 1953.

Protecting concrete in sub-zero weather. Concrete, v.52, n.6, p.18, 31, June 1944.

Salamanders and tarpaulins protect winter concrete. Construction Methods and Equipment, v.23, n.3, p.66, 113-5, March 1941.

Sheeting makes good enclosure for winter concrete work. Construction Methods, v.38, p.101, April 1956.

Short cuts for protecting fresh concrete from freezing. L.H. Tuthill. Western Construction, v.26, n.9, p.64-6, 150, September 1951.

Steam curing protects winter concreting. C.O. Crane. American Concrete Institute Journal, v.22, p.213-6, November 1950.

Steam heating plant warms concrete aggregate. Engineering News-Record, v.118, n.7, p.273, 18 February 1937.

Studies on the concrete electrically heated, J. Yamada. Japanese Society of Civil Engineers Journal, v.36, n.2, p.72-7, 1951.

Tents aid winter work on 79 Army buildings. Engineering News-Record (News Issue), p.576-7, 17 April 1941.

They gave this building a winter coat. Canadian Builder, v.14, n.11, p.38, November 1954.

Turn on the heat. Construction Methods and Equipment, v.35, n.11, p.66, November 1953; v.35, n.12, p.68, December 1953.

Unusual enclosure for winter building construction. Engineering News-Record, v.101, n.8, p.292, 23 August 1928.

Vienna building blanket keeps men busy all winter. Engineering News-Record, v.162, p.51, 9 April 1959.

Winter concrete work goes forward under enclosure at Gavins Point dam. Engineering News-Record, v.153, p.18, 30 December 1954.

Winter protection for construction. Engineering News-Record, v. 130, n. 20, p. 738-41, 20 May 1943.

Winter-placed concrete paving work easily protected. D.S. MacBride. Concrete, v. 42, n. 5, p. 3-5, May 1934.

Added November 1965 revision:

In winter; under - cover construction speeds projects. R.F. Legget. Engineering News-Record, Vol. 171, December 19, 1963, p. 58-61.

Men work inside on outside job. Engineering News-Record, Vol. 170, June 6, 1963, p. 49.

Added July 1969 revision:

Air Structures for Winter Construction. David E. Cornish. Province of New Brunswick, Department of Labour. Seasonal Employment Advisory Committee Report. 6p.

Building in Winter with the Aid of Enclosures. A. W. Smith. National Research Council of Canada, Division of Building Research, Technical Paper No. 85. January 1960; 11p. (NRC 5537).

Catalogue of Winter Building Equipment. Prepared by the London Master Builders Association in collaboration with the Ministry of Public Building and Works. 24p.

Housing Trends Prove Effective in Winter. R.E. Platts. National Research Council of Canada, Division of Building Research, Housing Note 14, December 1963, 2p.

Overkappingen enkele Voorbeelden van toegepaste overkappingen gedurende de Winterperiode 1964/1965. Documentatie samengesteld door / Stitching Verpetbestrijding Bouwnijverheid 1965. 31p.

Protective Clothing for Workers on Construction Sites. Report of a Competition. Her Majesty's Stationery Office, London. 1968. 36p.

Protective Materials for Arctic Exposures. H. Edwards. Engineering News-Record, Vol. 132, June 1, 1944. p. 95-99.

Provesorisk Tächning på vinterbyggen. Byggfärskiningen, Braschyr Nr. 8, 1954 14p.

Shutter Heater Panels Help Winter Building. Engineering, Vol. 202. September 2, 1966, p. 397.

Temporary Electric Heat Speeds Building Construction. Electrical
Construction and Maintenance. Vol. 64, November 1965,
p. 99-101.

These three Toronto Home Builders Find Winter Work Worthwhi'e
National Builder. Vol. 9, No. 10, October 1960, p34-5.

Vinterarkejdskeklaedning. Tornvod Sørensen. Statens Byggeforskningssintitut,
1963.. 4p.

Winter Construction - A Plastic Shelter for House Building in Winter.
A. W. Smith. Builders, Decorators, Architects. Year Book 1959.
p. 8-20.

I. EQUIPMENT

Cats work in the cold, too; Operation deep freeze. Diesel Power, v.34, p.49, August 1956.

Cold weather operation of diesel engines - Bibliography 2. M. W. Ayton, J. E. Shea, C. R. Brown. Library of Congress Technical Information Division, Washington, D.C., 145p. January 1958.

Cold weather tips for earth moving rigs. S. Beebe. Roads and Streets, v.87, n.12, p.93, December 1944.

Complete 40-acre parking lot despite wet November weather. Roads and Streets, v.101, n.10, p.96-97, 101, October 1958.

Electric heaters eliminate cold weather breaks in dipper handle of large stripping shovels. J. W. Bullington. Mechanisation, v.11, n.5, p.90, 92, 115, May 1947.

Electric heating units on shovel dipper and dipper handles reduce breakage, cut winter-time losses. J. W. Bullington. Coal Age, v.46, n.9, p.53-4, September 1941.

How to winterize construction equipment. Society of Automotive Engineers Journal, v.64, p.60-7, December 1956.

Maintenance do's and don'ts for electrical systems. Diesel Power, v.35, p.49, October 1957.

Proper equipment is key to success in winter concreting. Concrete, v.48, n.10, p.14, 16, October 1940.

Tractor-rippers can handle deep frost. Roads and Streets, v.102, p.90-1, January 1959.

Tractors of many types at operation deep freeze. Automotive Industry, v.117, p.52-4, July 1957. Compressed Air Magazine, v.62, p.235-8, August 1957. Electrical Engineer, v.76, p.749-50, August 1957.

Trucking problems in Alaska. R. C. Norrie, R. H. Kasper. Society of Automotive Engineers. Paper No. 852 for meeting 10-12 October 1956, 6p.

Turn on heat. Construction Methods and Equipment, v.35, n.11, p.66, November 1953; n.12, p.68, December 1953.

Winter operation of truck and tractor equipment in iron mining, K. L. Prothero, J. E. Meittunen. SAE paper no. 251A, 8 p., October 1960.

Winterization of construction equipment. R. W. Beal. Society of Automotive Engineers Journal, v.58, n.12, p.46-7, December 1950.

Winterization of construction equipment. Society of Automotive Engineers. Paper n.803 for meeting 10-13 September 1956, 9p.

Winterization of construction equipment. V. A. Woodling. Petroleum Engineer, v.27, p.D 88, October 1955.

You can doze in winter. Construction Methods and Equipment, v.35, p.50-3, January 1953.

Zemlesosnye snaryady spetsial'nogo naznacheniya, B. M. Shkundin. Gidrotekhnicheskoe Stroitel'stvo, v.28, n.1, p.42-50, January 1959.

Added November 1965 revision:

Carefully planned cold weather servicing. R.N. Smith. Pit and Quarry, December 1963, p. 100 - 3; January 1964, p. 157 - 61.

Cold Weather Storage & Starting Problems and Effective Aids. C.T. Newton. Society of Automotive Engineers - Paper 719B for meeting June 10 - 14, 1963, 3 p.

Diesel Engine Problems at Zero F and Below. G. Fisher. Society of Automotive Engineers, Paper 719C for meeting June 10 - 14, 1963, 4 p.

Overcoming Diesel Fuel Freezing. Oil Engine and Gas Turbine. Vol. 31, No. 361, November 1963, p. 37.

Winterizing art gains but new problems develop for arctic machinery operators. J.P. Gardner et al. Journal of the Society of Automotive Engineers, Vol. 72, May 1964, p. 57 - 9.

Added July 1969 revision:

Cold Weather Operation of Fuels and Lubricants in Western Canada.

W. F. Ellison, A. H. Scrimshaw. SAE Paper, 650639 for meeting Aug. 16-19, 1965. 11p.

Diesel Engine Operation in Cold Weather. R. C. Schmidt. SAE Paper 660011 for meeting 10-14 January 1966. 7p.

Heater Aids Cold-Weather-Operation of Hydraulic Equipment. C. E. Mays. Transmission and Distribution, Vol. 18, No. 3, March 1966. p. 74.

Puskovye iznosi dizelya pri primenenii legko osphamenyayushchikhsya puskovgkh zhidkostei. Yu. V. Mikulin, M. S. Mirnov, B. A. Englin. Vestnik Mashinostroeniya, No. 5 May 1966, p. 47-9.

Should There Be Cold-Weather Truck K. K. Stubenvoll, F. J. Mulligan SAE - Paper 660013 for meeting 10-14 January 1966, 6p.

Starting Diesels in Cold Weather. G. L. Cameron, J. L. Johnson, R. L. Larson. Diesel and Gas Turbine Progress, Vol. 32, No. 11, November 1966, p. 46-7.

Study of Ice Fog from Exhaust of Arctic Vehicles and Devices for Its Suppression. F. W. Pruden and R. L. Wardlaw, National Research Council of Canada, Division of Mechanical Engineering. Report MD-41A, July 1964, 70p.

Synopsis of Cold Weather Operation Problems of Engine Powered Equipment Experienced in Northern States and Border Areas of Canada. D. L. Raymond. SAE Paper 5406 for meeting 6 January 1964. 6p.

J. MISCELLANEOUS

Battling permafrost, sub-arctic weather and tough soil to give Fairbanks water. H. C. Westfall. Water Works Engineering, v.111, p.128-31, February 1958.

Blasting operations. N. B. Lobotskii. U. S. Snow, Ice and Permafrost Research Establishment, Translation 23, October 1953. 3p. (Translated by J. J. Peol from Stnoitel'naja Promyshlennost; v.21, n.9, 1943).

Bouwen in de Winter in Noorwegen Enkele gezichts-punten en gegevens. T. Degenaars. Ingenieur, v.69, n.22, p.B 47-57, 31 May 1957.

Canadians court winter work. Engineering News-Record, v.162, p.27, 26 February 1959.

Cold regions reached by the U.S. Corps of Engineers, R. R. Philippe. American Society of Civil Engineers Proceedings, v.83, (AT 1 n.1323) p.1-9; Discussion, R. F. Legget (AT 1 n.1328) p.3-5, July 1957.

Cold weather operation of distribution systems. E. J. Van Deusen. American Water Works Association Journal, v.43, n.11, p.909-10, November 1951.

Cold weather operation of sanitary landfill. K. S. Krause and C. W. Hamblin. American City, v.64, n.8, p.108-9, August 1949.

Cold weather welding. J. S. Wright. Welding Engineer, v.29, n.12, p.39, December 1944.

Construction of reservoirs in permanently frozen ground, I. A. Shappel. VODOSNABZHENIYE i SANITARNAYA TECHNIKA, n.2, p.13-6, February 1936. Model designs of small covered reservoirs excavated in ground underlain with ever-frozen soil (In Russian with brief English abstract p.78).

Current construction practice, H. W. Hunt. Engineering News-Record, v.128, n.3, p.105-6, 15 January 1942.

Electric heating prevents freezing on exposed water line. A. R. Gruehr. Engineering News-Record, v.135, n.22, p.743, 29 November 1945.

Excavating at 70° below zero. Pacific Builder and Engineer, v.50, n.1, p.36-8, January 1944.

Excavating in frozen ground. Franklin Institute Journal, v.264, p.86, July 1957.

Excavations in frozen ground - 2. Explosion tests in frozen glacial till, Fort Churchill, C. W. Livingston, G. Murphy. U. S. Snow, Ice and Permafrost Research Establishment, SIPRE Report no. 30, 19 p., 20 supp., July 1959.

Fighting Aleutian "Williwawa". W. R. Huntington. Western Construction, v.33, n.5, p.20-2, May 1958.

Guide to Arctic water works thermology. A. J. Alter. Consulting Engineer (St. Joseph, Michigan) v.9, n.4, p.84-8, April 1957.

Hot sand; one solution to the problem of digging ditch in frozen ground for laying mains in the wintertime. Marquesen, E. D. American Gas Journal, v.183, p.16-17, December 1956.

How builders can beat the cold weather. Engineering News-Record, v.154, p.45-6, 24 February 1955.

How to prevent damage from heaving of piping at regulator stations, C. E. Williams. Gas Age, v.111, n.7, p.32, 78, 26 March 1953.

Ice helped construct Lulea Bridge in Northern Sweden. S. Ewerdahl. World Construction, v.9, n.4, p.48-50, 53-4, April 1956.

Insulated flange saves kilowatts for pipe heating. A. R. Gruehr. Power, v.89, n.10, p.669, October 1945.

Keep that job moving in hot, wet or cold weather. American Builder, v.76, p.114-25, October 1954.

Modern triumph in the northern ice; construction of the distant early warning line. W. J. Kiernan, U.S. Naval Institute Proceedings, v.83, p.742-52, July 1957.

1960's biggest pipeline uses X-56 pipe for entire main line. Oil and Gas Journal, v.58, p.142, 14 March 1960.

Permafrost, J. S. G. Shotwell. Municipal Utilities Magazine, v.96, n.9, p.30-2, September 1958.

Permafrost - biggest state's biggest building problem. Architectural Record, v.124, p.178, December 1958.

Permafrost - Digest of current information. Canada, National Research Council, Associate Committee on Soil and Snow Mechanics, Technical Memorandum n.49, 31 p., August 1957.

Permafrost drilling, L. K. MacDonald, P. C. Bromner. Canadian Mining Journal, v.77, n.10, p.92-4, October 1956.

Portable shelters permit winter reservoir construction. Public Works, v.84, p.88, August 1953.

Problems associated with construction over permafrost,
A. V. Raison. Roads and Engineering Construction,
v.97, n.1, p.27-34, 106-8, January 1959.

Problems in construction in the far north. Abstract,
H. D. Monteith. Roads and Engineering Construction,
v.93, p.79, September 1955.

Pumping grandstand concrete in cold weather, E. D. Roberts.
Engineering News-Record, v.117, n.21, p.711-12,
19 November 1936.

Quick hardening cement used in winter repairs to reservoir,
C. E. Carter. Engineering News-Record, v.101, n.15,
p.557, 11 October 1928.

Review of frozen ground excavation methods, C. R. McCullough.
U.S. Army Snow, Ice and Permafrost Research Establishment -
Technical Report n.51, 9 p., February 1958.

Safety work in Alaska and Canada. Construction Advisor, v.17,
n.7, p.106-8, July 1945.

Setting cements in below freezing conditions, Major Foster L.
White. U.S.A.F. The Petroleum Engineer, v.24, n.9,
p.B-7, B-12, August 1952.

Sewers in permafrost, M. W. Slankard. American City, v.71,
n.12, p.80-1, December 1956.

Solving problem of "nalyeds" in permafrost region, A. Tchekotillo.
Engineering News-Record, v.137, n.22, p.724-6,
28 November 1946.

Sub-zero concrete pumping, F. A. Dale. Engineering News-Record,
v.121, n.13, p.407-9, 29 September 1938.

"Typically Canadian" - winter work on Uchi-Crow River Line,
G. Mitchell. Electrical News, v.49, n.16, p.22-5,
15 August 1939.

Ueber Bauen und im besonderen ueber den winterbau in Daenemark
und Schweden, J. K. Merinsky. Oesterreichische
Bauzeitschrift, v.12, n.2, p.25-31, February 1957.

Water supply of railroads in permafrost regions, M. I. Sumgin,
N. N. Geniev, A. M. Chekotillo. U.S. Corps of
Engineers-Snow, Ice and Permafrost Research
Establishment-Translation n.28, 64 p., October 1955.

What about the winter building bogey? Contract Record, v.42,
n.50, p.1279-80, 12 December 1928.

Winnipeg distribution digging fights through five foot freeze.
Gas Age, v.119, p.13-4, 16 May 1957.

Winter building is expensive but come spring, its more expensive if you're not ready. American Builder, v.78, p.82-5, October 1956.

Winter construction, C. R. Crocker. Engineering Journal, v.41, n.2, p.43-9, February 1958.

Winter construction in Ontario. Civil Engineering (London), v.49, n.581, p.1195-7, November 1954.

Winter diamond drilling, J. M. Gardiner. Canadian Mining Journal, v.67, n.3, p.172, March 1946.

Winter pipelining isn't a picnic, J. E. Lyle. Oil and Gas Journal, v.54, p.98, 29 October 1956.

Added November 1965 revision:

Arctic Construction, J.J. Scheuren, Jr., Journal of the Boston Society of Civil Engineers, Vol. 49, No. 2, April 1962, p. 120 - 142.

Arctic Drilling 1,500 Miles from Supplies. Oil & Gas Journal, Vol. 61, No. 26, July 1, 1963, p. 116 - 121.

Cold Weather Aspects of Mining & Materials Handling at Reserve Mining Company. M.G. Woodle et al. Minnesota University School of Mines & Metallurgy - Center for continuation study - Mining symposium for meeting January 14-16, 1963, p. 101 - 105.

Drilling 12,000 ft. Arctic Circle Wildcat. R.J. Enright. Oil & Gas Journal, Vol. 62, No. 14, April 6, 1964, p. 158 - 60.
